Water Out of Raleigh dries three floors of apartments using their Water Out® system

Answering a call from a local contractor, Robert Pettyjohn of Pettyjohn's Cleaning & Restoration/ Water Out of Raleigh located in Wake Forest, North Carolina found three floors of apartments flooded in a near-by community. A construction accident burst a pipe on the 3rd floor, causing water to soak through to the subsequent floors. WaterOut Raleigh worked quickly to dry these apartments so the displaced occupants could move back in as quickly as possible. All affected flooring materials and contents were able to be saved through the use of the mighty Water Out® trailer and other specialized drying equipment!

Water Out Coastal dries flooded finished basement in 2 days

Water Out Coastal in Jackson, NJ recently tackled a flooded finished basement at a residential home in Summit, NJ . The loss was caused by sump pump malfunction which left the entire basement soaked. After extracting the water a Doug Cressy, Project Manager and his team set up their Water Out® trailer along with a few air movers and began the drying process. The Water Out ® trailer was set up on a Saturday morning and by Monday morning the basement was completely dry and odor free. Because of the Water Out® system the carpet and walls were saved and there was absolutely no tear required. This saved the homeowner and insurance company, time, aggravation and more importantly thousands in replacement cost.
