Water Out in Libertyville, Illinois dries 17,000sf commercial building in 3 days

Will Hughes of Water Out in Libertyville, Illinois / Metropolitan Fire Restoration Services sent in a report on a large water loss they completed on a 17,000 square foot commercial building. Will reports: "Metropolitan was called to dry out the office space and we immediately responded. We used the YD9000 and managed to dry the entire 17,000sf office space in three days. The only reconstruction cost the insurance company had was replacing the vinyl baseboard and steam cleaning the carpet."

Great job guys!

YD9000 is the largest trailer mount drying system around. For more information on the YD9000 and the Water Out® drying system please visit our website at www.waterout.com.

Water Out of Eastern Washington dries local school in two days

Wilson Creek School in Wilson Creek, WA called Water Out of Eastern Washington / Just Right Cleaning on a Saturday morning regarding a water loss that they needed help with. When the team arrived at jobsite, they discovered the water loss was caused by an overhead sprinkler pipe that broke leaving quite a mess. They set up their Water Out Trailer along with six air movers to duct the hot air directly to the affected area. Two days later the area was completely dry and Wilson Creek School was back to business as usual.

Great Work!
