## Greetings!

### Water Out of Atlanta dries with Water Out Portable

Frank Leff, a long time Water Out member has steadily built his business through hard work and persistence. Frank started this new career after retirement as an executive in the car rental industry. Frank's Water Out business is a run from his home but despite that, Frank has participated along with his fellow Water Out members in drying projects caused by floods and hurricanes from Florida to Texas. Frank sent us this information about a project he completed using his Water Out® Portable equipment to provide the results that the homeowner wanted.

A 4:00 am call from a distressed homeowner came in as a result of a burst washing machine hose (*I'll bet Frank never got called that early in his former career*). The washing machine was located in a lower level of the home that was carpeted and finished. Upon inspection it was determined that all of the carpets and pad were saturated and that water had wicked up the painted sheetrock walls. There were sections of the flooded area that had hardwood flooring and they were equally saturated. After extracting the water, Frank set up his Water Out® Portable equipment and some air movers. Within three days the home was completely dry and all carpets, pad, sheetrock, moldings as well as the hardwood floors were completely dry. There was nothing to replace or repaint. A very satisfied homeowner and a stunned adjuster were glad that Frank Leff was on the job.

*Congratulations, Frank we are very proud of your work!*

### Water Out - Simcoe County / PDS in Simcoe County, Beeton, Ontario

Simcoe County quickly turned into a winter wonderland the weekend of November 15<sup>th</sup> -16<sup>th</sup>. With 22 centimeters of heavy wet snow falling overnight in combination with high winds, many trees and power lines were downed. In some cases power was out for 3 days, leaving homeowners' sump pumps inactive and their basements filling with water. Paul Davis Systems Simcoe County was able to help dry several family homes despite the lack of power with Water Out®. The Water Out® trailer was set up as the snow continued to fall after the sun set with string lights running off of the generator guiding the way. While the homeowners were warm and dry at a hotel for a few days, their house was also warm and dry by the time the power came back on.

*Great Job Guys!*
